

How do you know this program is right for you?

RELLIS
ACADEMIC ALLIANCE

RELLIS is small and unique

Located at the intersection of Texas Highways 47 and 21 in Bryan, the Texas A&M University System RELLIS Campus is a collaborative center built to foster higher education, advanced research, technology development, testing and evaluation, and hands-on career training.

Our campus offers many of the same amenities that you'll find at larger campuses, with an intimate touch: state-of-the-art classrooms and multiple study rooms with conference tables, white boards and large screen displays; focused and available instructors; and amenities such as a coffee shop, convenience store, health clinic, library and a courtyard for campus events.

In addition, RELLIS students are eligible to obtain Texas A&M University student passes to football games and other events, participate in Ring Day and other campus traditions.

RELLIS
ACADEMIC ALLIANCE

Health Science degree with West Texas A&M University

The health science program at RELLIS—offered through West Texas A&M University via the RELLIS Academic Alliance—emphasizes public health principles and their significance within the healthcare system. Key areas of focus include prevention; underserved populations; safety-net organizations; behavior-change interventions; the health system; and how acute and chronic diseases spread and grow. The program aims to address declining quality of life and rising mortality and morbidity rates, as well as interventions, programs and policies to improve health on local, state and national levels.

This degree prepares you for careers in health education, community health, administration, advocacy, home health, and more.

Develop as a community leader ready to serve in various facets of the health industry from Day One. Our students move into positions with a broad range of organizations, including hospitals, clinics, laboratories, government and private agencies, pharmaceutical and insurance companies, and consulting firms, as well as graduate and professional schools.

5 FACTS ABOUT OUR PROGRAM

- 1

Broad-based health program located at the RELLIS campus.

This program allows you to study allied and public health concerns and how these issues affect communities, states, and our nation.
- 2

Incoming freshmen lock in tuition for their full four-year degree.

\$315/credit hour or \$31,380 for the full four years. There are no additional tuition and fees, and you can take courses from other Texas A&M system schools on the RELLIS campus.
- 3

Ample professional development opportunities.

Prepare for your professional future through internships, independent studies, campus organization involvement, poster competitions and workshops.
- 4

Big campus town with very small class sizes.

The RELLIS campus is about 5 miles from our cousin Texas A&M University, which hosts sporting events, clubs and other traditional campus activities. Our relationship with Texas A&M permits students to participate in many of their associations and events along with RELLIS activities and clubs, which allows us to maintain small class sizes (9:1 student/faculty ratio), easy access to parking and other important amenities.
- 5

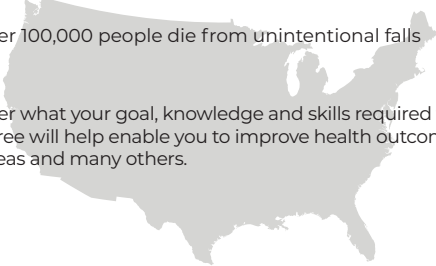

Focus on student success.

Although a cliché, our success is your success. We want nothing more than for you to reach your next steps after graduation, whether that be a graduate or professional school or gainful employment in the health field.

Key Health and Safety Statistics in the United States

- Obesity affects 41.9 percent of U.S. adults, rising from 30.5 percent in 1999
- Every 68 seconds, an American is sexually assaulted
- On average, there are 463,634 victims (age 12 and older) of rape and sexual assault each year in the US
- The number of uninsured people in Texas is 1.75 times higher than the national average
- About 3.2 million people visit hospital emergency departments for infectious or parasitic diseases
- Nearly 2 million people contracted chlamydia (2019).
- Nationally, firearm deaths increased 8 percent from 2020 to 2021
- Unintentional injury is the fourth leading cause of death in the US.
- 13.5 per 100,000 people die from unintentional falls

No matter what your goal, knowledge and skills required from this degree will help enable you to improve health outcomes in these areas and many others.
